

## APPENDIX A

The following list of building materials or replacement parts are considered suspect asbestos-containing materials and include but are not limited to:

Surfacing Materials:	Miscellaneous Material:
- acoustical plaster;	- damp proofing
- decorative plaster/stucco;	- door insulation;
- fireproofing insulation;	- ductwork flexible fabric connections;
- joint compound;	- electrical panel partitions;
- spackling compounds;	- electrical cloth/electrical wiring insulation;
- spray applied insulation;	- elevator, car, truck brake shoes;
- textured paint/coating.	- elevator equipment panels;
- <b>Thermal System Insulation:</b>	- fire blankets/curtains;
- boiler insulation;	- fire damper;
- breaching insulation;	- fire doors;
- fireproofing;	- fireproofing applied to exterior of high voltage cables
- HVAC duct insulation;	- flexible fabric joints (vibration isolation cloth);
- HVAC gaskets;	- floor backing;
- pipe insulation;	- gaskets and gasket material;
- taping compounds (thermal);	- gypsum wallboard;
- thermal paper products;	- heating and electrical ducts;
- valve packing.	- incandescent recessed fixtures;
- <b>Miscellaneous Material:</b>	- laboratory fume hoods (non-metallic & non-glass parts);
- adhesives/mastics;	- laboratory oven gaskets;
- asphalt/vinyl floor tile;	- laboratory table tops;
- base flashing;	- laboratory thermal gloves;
- blown-in insulation;	- packing materials;
- caulking/putties;	- packing or rope (penetrations through floors or walls);
- ceiling tiles/lay-in ceiling panels;	- reinforced roof flashing sheet;
- cement-insulating panels;	- roofing felt;
- cement pipes;	- roof flashing (plastic cement for sheet metal work);
- cement wallboard/siding;	- roofing paint;
- chalkboards;	- roofing shingles/tiles;
- construction mastic;	- vermiculite insulation inside CMU
- cooling tower baffles or louvers;	- vinyl sheet flooring/vinyl wall coverings;
- cooling tower fill;
